PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years at Central Apps shipping React, Next.js, and TypeScript web apps for healthcare and finance clients. Currently expanding into backend work with Node.js, Express.js, MongoDB, and MySQL. Recently shipped a production MERN job portal with 7 feature modules, 20+ REST endpoints, and JWT role-based auth, deployed on Vercel and Render. Uses Claude, GitHub Copilot, and ChatGPT daily for code review, refactoring, and debugging across the stack.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Redux, Formik, Zod, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Middleware, API Integration

Databases: MongoDB, MongoDB Atlas, MySQL, PostgreSQL

Cloud & Deployment: Vercel, Render, Cloudinary, MongoDB Atlas

Tools: Git, GitHub, Bitbucket, Postman, Swagger, VS Code

Languages: JavaScript, TypeScript, Python

AI-Assisted Development: Claude, GitHub Copilot, ChatGPT (code review, refactoring, debugging, frontend and backend cleanup)

PROFESSIONAL EXPERIENCE

Central Apps — Software Developer

August 2024 – Present | Chennai,Tamil Nadu, India

- Shipped full-stack features for 2 client products (Nexycare healthcare, Stockport finance) using React, Next.js, and TypeScript.
- Authored 15+ reusable UI components with shadcn/ui and Tailwind CSS, improving development speed and design consistency.
- Designed and consumed RESTful APIs integrated with MongoDB databases, ensuring efficient data flow between frontend and backend.
- Cut initial page load time by ~25% through code splitting, dynamic imports, and React.memo on heavy list components.
- Rolled out JWT-based authentication and role-protected routes for admin and client-facing surfaces.

Seval Software Solutions — Backend Development Intern

July 2023 – August 2023 | Chennai,Tamil Nadu, India

- Designed backend services using Python, Tkinter, and MySQL for desktop applications handling secure data storage.
- Gained hands-on experience in database schema design and SQL query optimization.

PROJECTS

Job Tracker — Full-Stack Job Portal Application

Next.js, TypeScript, Tailwind CSS, shadcn/ui, Tiptap, Node.js, Express.js, MongoDB Atlas, JWT, Cloudinary

- Shipped a production MERN job portal handling 50+ job postings and 30+ candidate applications across admin and candidate roles.
- Wrote JWT role-based auth that drives separate admin and candidate dashboards from a single protected /dashboard route.

- Wired Cloudinary into resume and profile uploads with file-type/size validation and signed URL generation.
- Configured CORS, environment variables, and MongoDB Atlas connection across 2 separately-deployed services (Vercel + Render).
- Modeled 5 MongoDB collections (users, jobs, applications, profiles, resumes) with referenced relationships.

Blog Application — Full-Stack Blogging Platform

Next.js, TypeScript, Tailwind CSS, shadcn/ui, Formik, Zod, Node.js, Express.js, MongoDB, Mongoose, JWT, bcryptjs, Cloudinary, Multer

- Built a full-stack blogging platform with JWT-based authentication, blog CRUD operations, search, sorting, and pagination.
- Developed REST APIs using Node.js and Express.js for authentication, blog management, and protected routes.
- Integrated MongoDB with Mongoose for storing users, blog posts, and application data.
- Implemented Cloudinary and Multer for secure blog image and profile image uploads.
- Added role-based authorization and protected update/delete actions using JWT middleware.
- Built responsive frontend pages using React, Next.js, Tailwind CSS, and dynamic slug-based routing.

Nexycare Diagnostics — Healthcare Web Application

React, Next.js, TypeScript, shadcn/ui, REST APIs, PostgreSQL

- Owned the frontend of a hospital diagnostics platform covering lab test pricing, doctor availability, and inventory tracking.
- Crafted 20+ React components for the booking flow, admin panel, and discount management screens.
- Hooked the UI to 15+ REST endpoints supporting live test catalog updates and appointment management.

Stockport — Finance Management Application

React, Next.js, shadcn/ui, REST APIs, MySQL

- Engineered a finance app with 4 modules (accounts, ledgers, tax lots, transactions) used by accountants and finance staff.
- Drafted responsive interfaces with shadcn/ui supporting ledger reconciliation and 12-month transaction history.
- Linked MySQL-backed APIs serving 10+ entity types across the accounting workflow.

Hotel Management System

Python, Tkinter, MySQL

- Developed a basic desktop hotel management application using Python and Tkinter.
- Implemented simple room booking and customer information entry functionalities.
- Integrated MySQL database to store customer details and room availability records.
- Designed a graphical user interface using Tkinter for hotel data management.

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering

St. Joseph College of Engineering | 2020 – 2024 | CGPA: 8.32

Higher Secondary Certificate (HSC)

K.C. Sankaralinga Nadar Hr. Sec. School | 81%

CERTIFICATIONS

- Python Programming — Pantech eLearning
- Data Analysis and Visualization with Power BI
- Full Stack Development Workshop — Elysium Academy
- Arduino — IIT Bombay
- Cisco Networking Workshop

LANGUAGES

English (Professional) | Tamil (Native)
